This application contains claims directed to the following patentably distinct species:

first species described on page 11, line 11 through page 12, line 24

second species described on page 12, line 25 through page 14, line 10 and

an in-determinant number of additional species (variants of the above species) described on page 14, line 11 through page 15, line 26.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, the examiner is unsure which, if any, claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. In the event one of the in-determinant number of additional species described on page 14, line 11 through page 15, line 26 is elected, applicant is required submit a proposed drawing correction illustrating it in response to this action. It need not be formal at this time, but it must be legible enough for examination purposes.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3753

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
